

WATER STONE

Master Planned Community of 82 Lots

The builders of Water Stone, an 82 lot planned residential development located in Lynnwood, WA had a very specific marketing plan for their development when they commissioned Nash Jones Anderson. NJA studied their requirements and developed 7 narrow lot plans featuring many amenities found in larger lot homes. Each plan offers 3 elevations to choose from and a three car tandem garage. The homes at Water Stone were priced in the upper \$300,000 and sold out within the first nine months.

Although the Water Stone Plans were developed specifically for the client and are not available for sale, we work with many builders in developing the master site and building plan for plats. Let Nash Jones Anderson develop plans to fit your specific market needs, as we did for the builders of Water Stone.
